SAUND HILL NEWS

home from a visit to St. Petersburg, Florida.

Miss Edith Merrill, of Birmingham, spent last week-end with Mrs. T. D. Follen and family.

Miss Mildred Whitaker, of Birmingham, is visiting relatives here.

Mr. Preston Brown, of Florence, and Miss Mercer Brown, of Elba, spent last week-end with Mrs. V. J. Follen and family.

Mr. Gene Tunney, of Hartford, and Earl Flaming, of Enterprise, were guests of W. C. Wallace one day last week.

Miss Myra Walton, of Hartford, is visiting relatives here this week.

Miss Vivian Roberts, of Waycross, Ga., is the guest of Misses Willie and Nulie Engram.

Mrs. J. D. Thomas, Sr., was the guest of her daughter, Mrs. Bonnie Jacobs, last Saturday.

Mrs. A. N. McIntosh and daughter, Jewel, were guests of Mr. and Mrs. Dan J. Thomas, last Friday.

Mrs. E. J. Thomas, Sr., was the guest of her daughter, Mrs. Bonnie Jacobs, last Saturday.

Mrs. A. N. McIntosh and daughter, Jewel, were guests of Mr. and Mrs. Dan J. Thomas, last Friday.

SNELLGROVE—FLOWERS

Mrs. R. C. Flowers will announce the marriage of her daughter, Miss Bonnie Lee Flowers, to Mr. Eugene Snellgrove, of New Brockton, which will take place at 10 o'clock at the home of the bride on Spring Hill.

Mrs. and Mrs. Snellgrove left for Panama City and other points in the Florida, immediately after the ceremony.

Mrs. and Mrs. E. J. Brunson and Misses Emma Farris and Lillian Rowe were visitors at Snellgrove, Fla., last week.

Messrs. F. P. and James Rainer, of Mobile, were guests of Mr. and Mrs. Dan J. Thomas yesterday.

Mrs. and Mrs. Fred Mays, of Mobile, were guests of Mr. and Mrs. Dan J. Thomas yesterday.

Mrs. and Mrs. E. J. Brunson and Misses Emma Farris and Lillian Rowe were visitors at Snellgrove, Fla., last week.

CLIPPER ONE DAY LATE

In order to get a complete tabulation of Tuesday's primary election for all state and county offices, the Clipper is one day late today. We are publishing the results of the election as they came in on Thursday afternoon, instead of Wednesday afternoon, as is our custom.

Through special arrangements we have gotten up the returns at complete, and the official count will not change the results to any great amount. We trust that our readers will bear with us in this delay, for it was impossible to get up the returns and get the paper out on time.

Misses Lizzy Lee Finell and Olive Massengale, of Tusculoo, are house guests of Miss Carrie Vaughn.

Mrs. and Mrs. E. J. Brunson and Misses Emma Farris and Lillian Rowe were visitors at Snellgrove, Fla., last week.

Worry makes this people thinner and fat people fatter.

Those who get caught are easier to convince that honesty is the best policy.

Perhaps radio sermons are popular because no collections are taken.

Many who consider themselves leaders will follow a little girl ball all day.

Put a little sugar into what you say, and take a little salt with what you hear.

Now that the debunkers have had a long inning, it is time that they should be debunked.

A German professor declares that earth worms can sing. Some other kind think they can.

Banishing filthiness had one drawback. If all were literate, where would we get our jurors?

It is amazing to see how much misinformation may be accumulated by one who diligently seeks it.

The shrewd politician usually hope on the band wagon as soon as he is fairly convinced of its identity.

Snuff-taking is said to be increasing in Czechoslovakia, where it will doubtless prove to be a great aid to pneumonia.

In states where capital punishment has been abolished governors are saved the trouble of signing commutations.

If we believed what their opponents say, we would conclude that all candidates are unfit to hold office.

Sheep without tails were developed after many years of careful breeding. When shows what may be accomplished by keeping a definite end in view.

RURAL BOY SCOUTS

Good progress is being made in a number of states in the extension of scouting activities to the rural districts, through the training of Lone Scouts who are unable to meet frequently with their fellows for group exercises.

At present there are 36 merit badges awarded for subjects available for the farm boy's pursuit, such as the fighting on the farm, or adjacent forests, tree culture, bird protection, clean-up programs and many others.

One more practical and useful piece of work recommended is the preparation of cabinets containing first aid kits in case of injury to persons or animals. At each home where a Boy Scout has such a cabinet a sign is placed, so that passersby may know that in case of accident first aid may be rendered.

The Boy Scout organization is doing a lot of good work through a special department of rural scouting, which provides a program designed enough to meet the needs of any boy, no matter where he lives.

This movement is a most worthy and beneficial one, deserving of all encouragement and cooperation by parents and teachers.

THEORY AND PRACTICE

It is mighty fine to know a lot, but it is even better to be able to do things. Many persons who have at their command a considerable amount of information are unable to put it to very much practical use.

This was neatly illustrated in a case of "confession" article by a teacher, in a recent periodical. She said:

"I can solve a quadratic equation, but I cannot keep my bank account straight."

I can name the Kings of England since the War of the Roses, but I do not know the qualities of the candidates in the coming election.

"I know the economic theories of Malthus and Adam Smith, but I cannot live with my income."

I can explain the principles of hydraulics, but I cannot fix a leak in the kitchen.

I have studied the psychology of James and Titchener, but I cannot make my own temper.

I can conjugate Latin verbs, but I cannot write legibly on the envelope.

While this picture may be somewhat overdrawn, it serves to illustrate the fact of much that is gained for education, when its results are put into practice.

It is especially in Florida, California and Louisiana, that this artificial world of about one-third of the population is so much at odds with the real world.

At present it is believed that the new theory may be most effectively used in combination with natural world in the production of surplus, blunders, errors and similar products.

But no one can predict what some process will be developed, may accomplish.

It is recalled that a few years ago a group of scientific experimenters sought to refute the old theory of the world by silencing the voice of a cow's ear.

They obtained first from a cow's ear and really made a pure, clear, ringing sound. Perhaps we may yet have perfectly good wool without sheep.

MORTGAGE FORECLOSURE SALE.

Not all the mysteries nor the seemingly impossible things are done by witches for Mrs. Purvis with her sparkling brown eyes and her cheerful personality is certainly no witch. Yet, with the ideas she received from Miss Allyn Hughes, county home demonstration agent, and \$3.45 which she made by selling a few culled hens from her flock, she has completely furnished the three rooms of her home.

This home is a weathered gray three-room house, set in the midst of a cotton field and shaded by a Chinaberry tree. For several years before its present occupancy, it was used for doing peanut hay. But, when the writer and the county agent called there one June morning, everything both inside and out was as clean as if the cats had just licked it. The rough floors were scrubbed white and the walls, which had been white, were brushed clean of spider webs and dust.

The furniture, however, was what caught and held the eye.

In the larger room which served both as living and bedroom, there was a bed, a library table, a chiffonier, a washstand and a pair of chairs. These articles which had done credit to most any cabin maker. The material from which they had been made was old bedsteads, mainly with boards from dog pools boxes, a few barrel staves and hickberry branches. Some of these had been her own, others were donated by neighbors from old, castoff pieces which they considered beyond repair.

Chop Ax and Knife

When asked what tools she used she said, "Well, that rocker was the first thing I made, and I had only a chop ax and a saw knife to work with." There was just part of the back and the rockers left of it, but with the help of boards from boxes it was completely restored.

"The other one I found down in a pasture where we used to cut corn," said Mrs. Purvis. "The rounds are of hickberry wood and the back of barrel staves."

A neighbor moved and left an old bedstead too dilapidated to carry along. It now is an attractive washstand in Mrs. Purvis' home. Her library table is made of parts of several old beds left over when she was remodeling for other people. The bed in this room has been saved down from a high, hideous oak one to low head and foot boards, with lattice strips which permit the passage of air.

But the crowning piece was the chiffonier with its three deep drawers and its mirror. All the furniture was in mahogany finish. A lovely pine needle basket filled with flowers—also the work of her hands—graced the library table.

When asked how she obtained the proper lines and proportion for

Alabama, Coffee County. Any person, firm or corporation having an unpaid claim against said contractor for supplying and

contractor with labor, material, foodstuffs, or supplies, in connection with said work, is hereby notified to present the same in the manner and in the time required by law.

W. T. WRIGHT, Contractor. Aug. 7-14-21-28.

Alabama's PROGRESS (1913-1934)

THESE seventeen years in Alabama history—from 1913 through 1929 have been an epoch of industrial development equaled in the annals of few states.

—During these seventeen years, the value of Alabama's manufactured products has increased approximately 237%—from \$178,797,633 to \$602,372,126.

—During these seventeen years, Alabama's total payroll has increased over 240%—from \$2,896,871 to \$115,468,817.

—During these seventeen years, the number of Alabama's wage earners has increased about 72%—from 78,717 to 131,207.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.

—During these seventeen years, the number of Alabama's manufacturing plants has increased about 100%—from 1,141 to 2,281.
